
KABUKI

Feel the brightness and fullness
of life here and now

KABUKI

Brand Representation

The idea to create a line of wines "Kabuki" was born after meeting with a friend from Japan Sakuma Toshio. He came to Moldova in 2015 and brought Japanese wine.
It was decided to create a joint brand "Kabuki", which is based on pleasant and natural fruit flavors.
Therefore, the line of wines "Kabuki" was introduced to the world thanks to the combination of the ancient knowledge of Japanese winemakers and the unique modern experience of Moldovan wine producers.
The new product organically combines the taste of wine and flavors of bright fruits from all over the world, which are expressively united with each other.

Brand philosophy

The philosophy of the Kabuki wine brand is based on the projection of the wine world into modern life in all its diversity and uniqueness, revealing the inner world of every Person. Wine is the focus of the philosophy of life, the disclosure of the world of real emotions.

Brand mission

The mission of the Kabuki brand is to help a Person feel the fullness of life and realize himself as a part of the Universe. Wine is a unique product that is associated with the joy of communicating with friends, traveling and the emotions of new discoveries, exploring the diverse cultures of the world, and learning about wine gastronomy. It fills us with real emotions, encourages us to move forward towards our dreams.

Brand features

Kabuki brand wine is special because it harmoniously combines unique age-old traditions and elements of modern life. This combination is difficult to maintain in perfect balance, but the brand succeeded in this. In addition, the Kabuki brand does not produce spirits, but specializes in positioning wine as a social drink.

KABUKI

The target audience

The main audience of the Kabuki brand is young people aged 20-40, who can be called “youth”. With the help of wine, they learn the geography of the world, the philosophy of life, gastronomy and the aesthetics of human communication at parties, meetings with friends, birthdays, where light and refreshing drinks of the Kabuki brand will become an organic addition to the atmosphere. But, as you know, age is not always changed by the data in the passport. This is a state of mind.

Brand values

Wine for us is a special unique value that contains harmony, powerful energy, emotions, sensuality and state of mind. The Kabuki brand aims to combine traditional values that have been formed over the centuries, preserving culture, traditions and customs, with modern ideas of the Person about the world and understanding of Individuality in the world.
When a modern person opens a bottle of wine, for a moment he is immersed in that atmosphere and the meaning of life that winemakers have cherished and revived for centuries. And he learns to appreciate in the present what has shaped our present. Because only when a person respects the past, the future is revealed before him. He is ready to immerse himself in the amazing feelings and energy of the wine world, even from the first sip of wine to feel in his mind a picture of his own limitless possibilities and the amazingness of the world around him.

«Wine as a philosophy of life»

KABUKI

Welcome speech from the head of the brand

Greetings, friends!
Wine is a philosophy of life and a way of knowing the Universe that surrounds us.
Wine is an important part of modern life. One of the main advantages of this drink is that it has a unique ability to bring people together: it enlivens communication with friends, stimulates business conversation, sets up a fruitful dialogue, and expands the circle of social contacts.
Wine is a step on the way to rethinking your life, your own emotions, to the knowledge of your sensory world. The unique taste of wine will allow you to bring to the surface your innermost thoughts, to touch the subtle emotional beginning of our soul.
So, wine is a philosophy of life that unites people, gives energy and contains a unique cultural component that can give us emotions, reviving the past and helping in the present.
Moldova is an original and diverse country, one of the oldest wine regions in Europe with long traditions and unique wine making secrets.
Here, under a lucky star, the fateful meeting with the legend of Japanese winemaking, my good friend Sakuma Toshio, took place, who brought real Japanese wine with him.
After the tasting, we wanted to make a blend of Moldovan and plum wines. Having tried this taste, we "caught" the state of Zen, in which the soul of a person is revealed, uniting with the universe.
It was decided to continue this unique experiment. As a result of joint fruitful work, a new, unique wine taste was born - Kabuki.
Kabuki brand has concentrated a unique combination of ancient Japanese winemaking traditions and the professionalism of Moldovan winemakers, revealing to the world a product of a high European standard.
Kabuki wine line is produced on modern equipment using modern technologies. We work together with master winemakers from Japan, who have passed on to us unique methods for creating the unique taste of each position of the Kabuki line.
The sale of brand products began with Moldova, Kazakhstan and Ukraine. Now we are developing active cooperation with many European countries and intend to develop all the markets of the world.
Despite the variety of wines in the world, it is not so easy to buy real wine made with soul. Realizing this, we wanted to create a unique product that will satisfy even the most sophisticated taste of the wine gourmet.
Try it yourself!

Description of the brand line

KABUKI

White plum

Wine line: Kabuki
